Subject: Teaching and Learning in a Remote Environment.

In response to the pandemic, the United States Department of Education's (USDOE's) Regional Educational Laboratories (RELs) have collaborated to produce a series of evidence-based resources and guidance about teaching and learning in a remote environment. This series-- a mix of infographics, blogs, webinars, videos, activities, Ask A REL content, and FAQ documents--covers a range of topics including **early childhood education, English language learners, and students with disabilities**. Additional resources will be added to the series in response to the growing number of educational needs. You can find the [REL Covid-19 resources](#) on the REL - Northeast and Islands (NEI) website. The REL website also includes additional [REL-NEI COVID-19 FAQ's](#).
